

Description		Levels/ Effect
1	Self-Distancing: reduction of mean number of contacts per day per individual	20% , 50%
2	Self-Isolation of symptomatic (!) people in individual tents	Number of available tents: 10, 20, 50, 100, 250, 500, 1000, 2000
2b	Number of carers (☾): healthy people that will take care of self-isolated people	1 per tent
2c	Self-Isolation delay: time from symptom onset to self-isolation	12h, 24h, 48h
3	Safety zone: designated area for vulnerable population	Older adults only Older adults + Adults with comorbidities Older adults + Adults with comorbidities + Healthy adults & Children (up to 20%, 25%, 30% population)
3b	Number of contacts people in the safety zone can have with people from the exposed zone (contacts always happen in the buffer zone)	2 or 10 contacts (per week per individual residing in the safety zone)
3c	Health checks	Exclude symptomatic (!) people from meeting with people from the safety zone
3d	Lockdown of safety zone if one case is detected in the exposed zone	Reduces value of 3b by 50% or 90%
4	Evacuation of severely symptomatic	Evacuated individuals cannot infect other people from the camp, but they do not receive healthcare
Buffer zones: open space, 2m distance, use of face cover		Reduces probability of infection by 80%
